

# CUT MATERIAL & LABOR COSTS SAFETY RAMP

## What it is:

Safety ramps are a reusable alternative to cold patch temporary ramps on non-interstate roads up to 55mph. Made from recycled rubber.

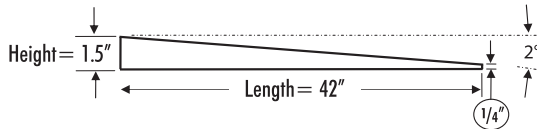

## What it does:

Allows smooth, safe passage for motorists over transverse milled edges, steel utility plates, end of day joints, and at bridges.

### SR1.5-36

(59 lbs. • 36" Wide)

**SR1.5-36** Safety Ramps are designed for milled butt joints or end-of-day joints. They are a huge time saver when taking up and making roadway ready for paving. Back out screws and throw Safety Ramps into pickup truck and take to next job.

### SR1.5-12

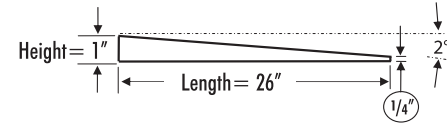

(19 lbs. • 12" Wide)

**SR1.5-12** Safety Ramps are used when you need to fill in a roadway that is not 12'. Just put down four SR1.5-36 plus one SR1.5-12 and you have a 13' lane. This allows you to build a custom width.

### SR1-36

(29 lbs. • 36" Wide)

**SR1-36** Safety Ramps are designed to butt up against steel utility plates in order to make a quiet smooth transition from roadway to steel plate.

## Safety Ramp Fast Facts

- Designed for easy installation and removal by one person.
- Each interlocking ramp section weighs less than 60 lbs.
- 24 feet of temporary ramps can be installed by one person in 20 minutes. Each section weighs no more than 59 lbs.
- Screws are driven into asphalt with rotary hammer.
- Screws are easily removed with cordless drill
- Safety Ramps taper from a thickness of .25 inch to 1.5 inches over a total length of 42 inches.
- Interlocking ramp sections are available in 3 ft. and 1 ft. widths.
- For 2 inch depths, shim the thick edge of the ramp up to pavement level with 1/2 inch of belting.

## Safety Ramp Advantages

- **Safer for workers** than asphalt. Fewer workers exposed to traffic and total exposure time is shortened.
- Smooth, uniformly molded Safety Ramps are **safer for drivers**.
- **Reduce labor costs** to install and remove ramps.
- **Eliminate heavy equipment and operator costs** required to install and remove asphalt ramps.
- Reusable Safety Ramps **eliminate ramp material costs**.
- Reusable Safety Ramps **eliminate clean-up and disposal costs** of used asphalt ramp material.
